

Reykjavík  
16<sup>th</sup> of September 2025

The Genetics group at Matís is seeking 1-2 internship students to join the group in early 2025 for a duration of 6-12 months.

Matís is a public R&D company in the food and biotechnology sector. We are engaged in analytics and services, primarily measuring the chemical and microbiological content in food, feed and water samples; as well as diverse research projects in applied sciences in biotechnology, food-science and related fields.

The Genetics-group is a service lab involved in genetic screening for various purposes, including for genotypes associated with disease or with disease protection, for parentage, and other, largely for the agricultural sector.

The prospective students would participate in diverse activities within the group, depending on the project status at the time, which may include sample preparation, DNA isolation/purification, and diverse downstream processing for genotyping.

During the internship, Matís offers accommodation, meals at work-hours and a bus-card.

Interested students can send their CVs and a short introductory letter to the Research Group Leader of Genetics, Björn Þór Aðalsteinsson, at [bjornth@matís.is](mailto:bjornth@matís.is).
